1. Executive Summary

This report presents the findings of an open-source intelligence (OSINT) and passive vulnerability assessment conducted against **itworksme.com**. The assessment enumerates externally observable infrastructure, identifies exposed services, evaluates configuration and cryptographic posture, and correlates findings against live vulnerability databases.

Key Metrics

Overall Risk Rating	MEDIUM
Total Findings	0
Critical	0
High	0
Medium	0
Low / Informational	0
Subdomains Discovered	0
Unique IPs	0
Open Services	0
Amass Hosts	0

2. Vulnerability Findings

No vulnerabilities were identified during this assessment.

3. Reconnaissance

4. Attack Surface

4.3 SSL / TLS Analysis

port_443

Subject	itworksme.com
Issuer	WE1
Valid From	Mar 24 02:51:25 2026 GMT
Valid Until	Jun 22 03:49:50 2026 GMT
Signature Algorithm	ecdsa-with-SHA256
Key Strength	{'type': 'EC', 'bits': None}
Protocols	2, 3, 1.0, 1.1, 1.2, 1.3

5. Open-Source Intelligence

6. Remediation Recommendations

No explicit remediation steps were produced for the findings in this assessment. Follow industry best practices (CIS / OWASP / NIST SP 800-53) to harden the exposed services identified above.
